Omar Hagag

BACKEND DEVELOPER

Cairo, Egypt (Open to relocation) | omarhagag0101@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Builds practical web applications and data-processing tools using Python, Flask, and JavaScript, with a strong foundation in data structures, algorithms, and object-oriented programming.

EDUCATION

Faculty of Computers and Information, Assiut University — Assiut, Egypt

B.S. in Computer Science | Expected graduation: 2028

PROJECTS

Red-harvest | Developer · In Progress

Tech stack: Python, Flask, HTML, CSS, JavaScript, yt-dlp, FFmpeg | GitHub

- Built a Flask-backed local web interface for configurable video/audio downloads, including format and resolution selection, playlists, and output-directory options.
- Integrated yt-dlp and FFmpeg for media retrieval, audio extraction, and format conversion; developing validation, status reporting, and frontend error handling.

Gadwali | Developer · Deployed

Tech stack: Python, openpyxl, JavaScript, HTML, CSS | Live demo | GitHub

- Built a Python/openpyxl parser that converts multi-sheet Excel timetables, including merged cells, into JSON datasets for the frontend.
- Developed a JavaScript timetable viewer with year/group/section filters, current/next-class highlights, overlap detection, responsive layouts, persistent selections, and a GPA calculator.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript (basic) | **Backend:** Flask (basic project experience), HTTP/REST fundamentals

Web: HTML, CSS | **CS Fundamentals:** Object-Oriented Programming, Data Structures and Algorithms

Databases: SQL, relational database fundamentals | **Tools:** Git, GitHub, Linux, Command Line

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- ECPC Qualification Contest (2026): Competed in a three-person team, solved 5 problems, and ranked 44th among 300+ participating teams.
- **Codeforces:** Solved 252 problems — profile
